Software Engineer

I am a results-driven software engineer with a strong focus on building AI-powered solutions. I combine solid professional experience with a passion for personal projects, allowing me to quickly adapt and implement modern technologies.

Recently, I have been working with AI systems, including large language models, automation workflows, and data-driven applications. I enjoy solving complex problems and turning ideas into practical, high-impact solutions.

I am seeking opportunities where I can leverage AI to create real business value.

MY EDUCATION

2023 – 2025	University Of Veliko Tarnovo “St Cyril and Methodius” Web technologies and software development
2019 – 2023	University Of Veliko Tarnovo “St Cyril and Methodius” Software Engineering
